

Expert transfusion support you can rely on

From routine screenings to the most complex antibody investigations, hospitals and blood centers across the country look to Innovative Blood Resources to deliver biomedical solutions and the technical expertise they need to ensure the safety and well-being of their patients.

CREDENTIALS & EXPERIENCE

- AABB, FDA, and CLIA accredited
- Accredited partner of AABB's American Rare Donor Program
- Recognized industry leader for the discovery of multiple new blood group antigens

VALUE ADDS

- 24/7 access to physician experts and highly-trained lab technologists—SBB certified
- Test-of-Record on all crossmatched units—free of charge
- Historic antigen typing (C, c, E)—free of charge
- Historic antigen phenotype (RBC) on packing slips—free of charge

BEST-PRACTICE TURNAROUND TIMES

- 90%—average TAT for final reports within 1 working day
- Basic antibody ID—2-4 hours
- Complex workups—4-8 hours

Antibody identification is routinely performed using polyethylene glycol (PEG) as an enhancement media.

QUALITY SERVICES

- Serologic and molecular testing
- ABO, Rh, and antibody screening
- Antibody identification and red cell crossmatching for transfusion and prenatal care
- Antigen typing on all antigen negative red blood cell units
- Platelet compatibility/crossmatching
- HDN evaluation (mother and infant)
- Kleihauer-Betke testing for fetomaternal hemorrhage
- Donath-Landsteiner testing
- Sickle cell screening

BUILDING HOSPITAL CAPACITY

Partner hospitals benefit from a variety of staff development opportunities, including:

- Expert advice on reagent selection and workup algorithms
- Clinical training opportunities for hospital-employed students-in-training
- In-service lab staff training in both the theory and science of lab testing and screening (e.g., single and multiple antibody identification and patient phenotyping)
- Presentations for hospital staff on highly-informative cases that highlight a challenging problem, a finding that advances knowledge of the field, or a recently-proven testing procedure

"No matter what our needs or how frantic we are, we always get great service. You go the extra mile, whether finding rare units or working up our patients with five antibodies in the middle of the night."
—St. Joseph's Hospital, St. Paul, MN
